

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at line 15 on page 17 of the specification with the following amended paragraph, wherein deleted material is indicated by strikethrough:

Those of ordinary skill in the art realize that methods involved in managing browser sessions in multi-server and single-server workflow environments may be embodied in a computer program product that includes a computer-usable medium. For example, a computer usable medium can include a readable memory device, such as a hard drive device, a CD-ROM, a DVD-ROM, a computer diskette or solid-state memory components (ROM, RAM), having computer readable program code segments stored thereon. ~~The computer readable medium can also include a communications or transmission medium, such as a bus or a communications link, either optical, wired, or wireless, having program code segments carried thereon as digital or analog data signals.~~
